- Beech wood spring slats with a carbon finish
- Exterior rails made of high-quality solid beech wood with sanded and oiled surface
- Made in Germany

FR 6

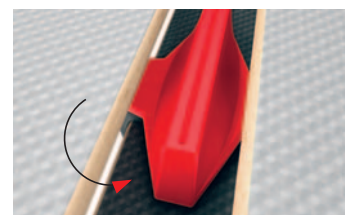

FR 6 Base frame

Flat in design, the FR 6 base frame is exceptionally sturdy thanks to its dowelled and glued frame structure. The shoulder zone is softer and allows your shoulders to sink more deeply into the mattress. The middle zone is fitted with double slats, allowing the firmness to easily be adjusted.

Middle zone reinforced.

Middle zone not reinforced.
